National Training Network

**Staff Development
+ Proven Methodology
MATHEMATICS SUCCESS**

“Our school district is committed to preparing all students for success in college, careers, and life. Knowledge of mathematics is essential to this goal. The strength of National Training Network is that it combines hands-on curriculum, intensive professional development, ongoing modeling, and coaching support. With this combination of components, National Training Network provides our school district with the right tools to direct our students toward success in algebra.”

—Dr. Joe A. Hairston
Superintendent
Baltimore County Public Schools
Baltimore, MD

Seven Levels of Staff Development Support

A team of National Training Network staff partner with a team of Local Education Agency staff to create a comprehensive resilient plan to improve mathematics instruction utilizing the “Seven Levels of Staff Development.”

Level 1: Intensive Professional Development

Teachers are prepared to incorporate the key mathematical concepts using unique methodology and to build the capacity of the district. Professional development also is provided to school and central office administrators to support implementation.

Level 2: Comprehensive Lessons

A complete set of concept based lessons, each using multiple representations is provided to each teacher giving them the means to immediately implement their professional development.

Level 3: Coaching

Personalized support is provided to district, school, and individual teacher needs through ongoing communication, staff development, team teaching, planning, and data analysis.

Level 4: Assisting Through Looking at Students (ATLAS)

A unique means to gather data, ATLAS identifies student engagement, and allows teachers and coaches to collaborate on ways to improve student growth and success.

Level 5: Professional Learning Communities

Professional Learning Communities are designed by coaches in consultation with teachers and administrators based on an analysis of ATLAS data.

Level 6: Technology

Students, parents, teachers, and administrators have open access to NTN's website – www.NTNMath.com which includes video demonstration lessons, homework, and lesson notes. Additional technology support including digital versions of instructional materials, ATLAS, e-communications, and web based staff development are provided to all participants.

Level 7: Leadership Academy

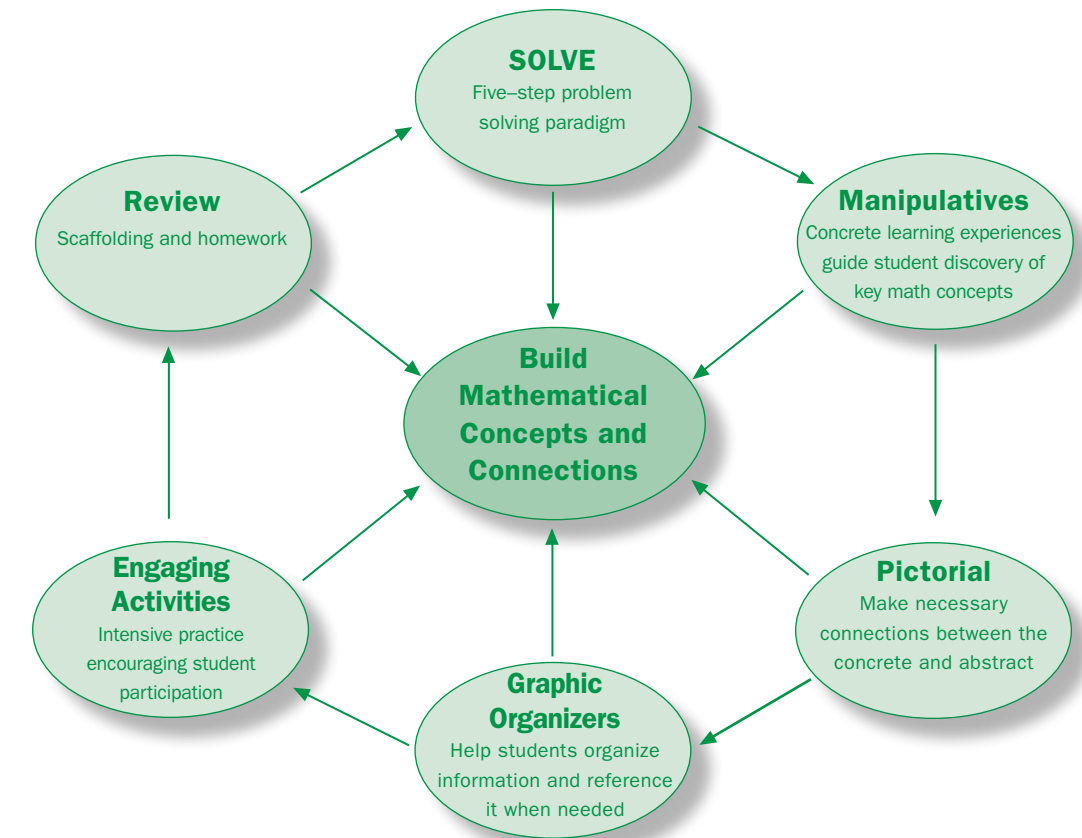

NTN provides leadership academies across the country to build mathematics leadership at the classroom, school and district levels.

“The National Training Network has been committed to provide a hands-on curriculum that engages and supports learning, intensive professional development that facilitates teacher growth in a safe and challenging way, and ongoing coaching support for our staff in a healthy manner.”

— Dr. Josh Garcia
Executive Director of Teaching and Learning
Federal Way Public Schools
Federal Way, WA

NTN Methodology

Every lesson links multiple representations to help students make critical connections needed to understand the mathematical concepts.

“National Training Network ensures the developmental progression of concept instruction in a systematic way. It is evident that the achievement gap is narrowing for our students with a history of difficulty in math.”

—Dr. Eva White
Academic Manager, Area 3
Clark County Schools, Las Vegas, NV
